

TAMASRU PAIN

Full Stack Developer | React.js | Next.js | Node.js | React Native | TypeScript

Portfolio | LinkedIn | GitHub | tamasrupain02@gmail.com | +91 99039 58424 | Available immediately | Open to relocation

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on professional and freelance experience building production-ready SaaS products, HRMS systems, and cross-platform mobile apps using React.js, Next.js, Node.js, TypeScript, and React Native. Independently delivered 4 production systems at Patronus Auto within 6 months, and subsequently shipped FormFlow (live SaaS, Vercel) with AI integrations and Expenso (published Android app, EAS Build v1.0.1) as independent full-stack projects.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, Bootstrap, Daisy UI, Shadcn/ui

Backend: Node.js, Express.js, NestJS, REST APIs, JWT, WebSockets

Auth & Cache: Better Auth, Clerk, Upstash Redis, Upstash QStash

Database: MongoDB, MySQL, PostgreSQL, Prisma ORM, Supabase, Neon

Mobile: React Native, Expo, EAS Build

AI & APIs: OpenRouter API, Google Maps API

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS

Tools: Git, GitHub, Postman, Figma, VS Code, Webstorm

Cloud & DevOps: Vercel, Netlify, VPS Deployment, Nginx, PM2, CI/CD

PROFESSIONAL EXPERIENCE

Associate Software Engineer (Full Stack) - Patronus Auto Pvt Ltd | Siliguri, West Bengal

November 2025 – April 2026

- Independently designed and developed "DeMenson", a scalable HRMS for 20+ employees covering leave management, attendance tracking, payroll, timesheet, and employee records management, reducing manual HR processing time by 30%.
- Designed and deployed Patronusauto.com using Next.js and Tailwind CSS with Server-Side Rendering (SSR), SEO optimization, and production deployment on VPS via Nginx + PM2, achieving 40% performance optimization in page load time.
- Developed "Field Pilot" Android application using React Native Expo for technician appointment management, enabling real-time job assignments, status updates, and location tracking for 20+ field technicians.
- Engineered 'Navicmate GPS' React Native app using Expo and Google Maps API — customer-facing real-time vehicle tracking application for Patronus Auto's core product offering, serving as core product for 100+ customer vehicles.

Freelance Full Stack Developer — Remote

June 2025 – Present

- Delivered 3+ client web projects using Next.js, React.js, Tailwind CSS, MongoDB, REST APIs and API integrations — including business websites, product catalogs, and mobile-first responsive design implementations for SMEs and service firms.

PROJECTS (tamasrupain.vercel.app)

FormFlow – AI-Powered SaaS Form Builder | [GitHub](#) | [Live Demo](#)

- Architected and shipped a production SaaS form builder with component-based architecture, drag-and-drop canvas (dnd-kit), multi-step form rendering with Framer Motion transitions, and a real-time notifications center with client polling.
- Designed an async AI insights pipeline using Upstash QStash to decouple OpenRouter AI workloads from the request cycle; implemented Upstash Redis caching on public embed routes to eliminate redundant DB roundtrips.
- Implemented Better Auth (Email + Google OAuth), SMTP email alerts via Nodemailer, and per-response AI summary pages with markdown rendering; deployed serverless on Vercel free tier, achieving sub-200ms response times on cached embed routes.
- Tech Stack:** Next.js 15, React 19, TypeScript, Tailwind CSS v4, Neon PostgreSQL, Prisma ORM, Better Auth, Upstash Redis, Upstash QStash, OpenRouter API, Framer Motion, Zustand, Nodemailer

Expenso – Personal Finance Mobile App | [GitHub](#) | [APK Download](#)

- Shipped and published a cross-platform personal finance app (Android APK v1.0.1 via EAS Build) with transaction management across 15+ categories, 5-screen analytics dashboard with 3 chart types across Weekly/Monthly/Yearly views with pie charts and heatmaps.
- Engineered a full gamification system — daily login/activity streaks, 6 unlockable achievement badges (Early Bird, Budget Master, Super Saver, Night Owl), Silver rank progression, and interactive achievement toast notifications.
- Implemented Savings Goals with real-time progress tracking, calendar-based Spending Heatmap, push notifications, biometric authentication, and complete auth flow (Clerk Expo) including Forgot Password.
- Tech Stack:** React Native (Expo v55), TypeScript, Expo Router, Zustand, Supabase, Clerk, react-native-reanimated, EAS Build

EDUCATION

Master of Computer Applications (MCA)

Techno International New Town | MAKAUT University

CGPA: 7.68

2022 – 2024

Bachelor of Computer Applications (BCA)

Techno India Institute of Technology | MAKAUT University

CGPA: 9.06

2019 – 2022
